

## IT Developer

### Role Purpose:

eCOMM are a leading Irish Fintech – current holder of the **eCommerce & Payments Awards Best Payments Start-up**, and a **2019 Deloitte Technology Fast50 Winner**. 2019 has been a year of significant growth for the company and our Development & Innovation plans for 2020 are equally as exciting. We are now looking to hire **IT Developers** at our Head Quarters in Navan.

The purpose of this role is to work on delivery-focussed development projects and to provide knowledgeable escalated support post-launch. You will have access to the latest technologies – C#/.NET Core, Angular 7.0+ / Typescript, MongoDB, SQL, Redis, Rabbit MQ, Git, Bit Bucket, RESTful API, Swagger – while operating as part of a focussed team consisting of other IT Developers, Business Analysts, Project Managers and key stakeholders. This is an excellent opportunity for anyone who has 1 – 2 years IT Development experience and is looking to launch a career in the FinTech / Payments Industry.

### Responsibilities and Accountabilities:

- Write and implementing effective, re-usable, secure code for the eCOMM Application Product Set;
- Integrate with Internal and External RESTful API's and Web Services;
- Carry out Unit Testing on the code you write;
- Carry out Code Debugging as required;
- Deploy your Code to Test and Staging environments in accordance with the DevOps Control Framework;
- Provide escalated post-production support;
- Collaborate with designers and other teams to enhance the existing product offering and bring new products to market;
- Comply with all company Controls including PCI-DSS;

### Qualifications and Requirements:

- Computer Science / Software Engineering / Software Programming & Development Graduate;
- 1 – 2 years prior experience as a Developer;
- Previous experience of one or more of the following would be an advantage – Angular, C#, RESTful, Mongo, JavaScript;
- A high standard of oral and written communications skills is required;
- Ability to learn new technology quickly;
- Any previous experience of working within the payments industry would be an advantage;
- Ability to stay controlled under pressure and operate to tight timeframes;
- Must be flexible to changing working conditions and willing to 'go the extra mile' to resolve issues as and when required;
- Previous experience of working within a Project / Team-based structure would be an advantage;
